

FIG - 1

Compatibility of 0.4% Carbopol(R) ETD 2020 Polymer with 0.3% Cetrimonium Chloride, at pH 7.0 – 7.5 w/NaOH

FIG - 2

Compatibility of 0.4% Carbopol(R) ETD 2020 Polymer with 0.3% Stearalkonium Chloride, at pH 7.0 – 7.5 w/NaOH

FIG - 3

Compatibility of Carbopol(R) ETD 2020 with 0.3% Oleaikonium Chloride,  
at pH 7.0-7.5 w/NaOH

FIG - 4

Compatibility of 0.4% Carbopol(R) 980 Polymer with 0.3% Stearalkonium Chloride, at pH 7.0 - 7.5 w/NaOH

FIG - 5

Compatibility of Carbopol(R) Ultrez 21 Polymer with 0.3% Olealkonium Chloride, at pH 7.0 – 7.5 w/NaOH

FIG - 6

Compatibility of Carbopol(R) ETD 2050 with 0.3% Cetrimonium Chloride,  
at pH 7.0 - 7.5 w/NaOH

7/11

**FIG - 7**

**Rubine Dye Test (Cetrimonium Chloride)**

8/11

**FIG - 8**

**Rubine Dye Test (Stearalkonium Chloride)**

FIG - 9

Rubine Dye Test (Olealkonium Chloride)

10/11

**FIG - 10**

**Work to Comb Through Wet Tresses (Cetrimonium Chloride)**

11/11

FIG - 11

Work to Comb Through Wet Tresses (Cetrimonium Chloride)
